\$325 per week (supplies included)

**LOCATION:**

communication clubhouse

Evidenced-based Lego therapy provides a fun opportunity for children with social communication difficulties to strengthen the following skills under the guidance of a certified speech & language pathologist:

- Social problem solving
- Conversation skills and conversation repairs
- Joint attention and turn-taking
- Self-initiated peer contact and cooperative play
- Overcoming inflexibility
- Building perspective taking
- Impulse control

\*\*In order to place group members appropriately, interested participants may need to be seen for a social skills consultation. Average to above average language skills required.\*\*
